

NetSuite

GET CONNECTED AND AMPLIFY THE
VALUE OF ERP AND CRM DATA

“ Jitterbit provides us a standard platform on which to build our integration projects, allowing us to quickly and cost-effectively synchronize our ERP and CRM apps.”

– KEITH LOVERN, TECHNICAL OPERATIONS, ACAL BFI

NetSuite helps thousands of companies plan all aspects of their business in the cloud. But to get the most out of NetSuite, companies need it to reflect information from many other sources, including CRM systems, databases, or custom apps. Jitterbit makes it fast and easy to connect between NetSuite to other popular systems, improving every company's ability to get the most out of NetSuite. Preconfigured Jitterbit templates include built-in configurations based on industry best practices, to help make business processes as smoothly as possible.

By connecting NetSuite to other systems, companies can extract greater value from NetSuite and operate with complete confidence that every decision made and resource allocated is based on the most accurate, up-to-date information. Jitterbit offers the speed and flexibility needed to enable successful cloud integration and affords the opportunity to select NetSuite as a system of record for accounting, product information, or even customer information based on individual business needs. With Jitterbit in place, NetSuite becomes the reliable backbone of a successful digital business.

NETSUITE ECOSYSTEM BENEFITS

- ✓ Connect the front and back office quickly, seamlessly and accurately
- ✓ Amplify the value of all information in NetSuite by connecting it to other systems
- ✓ Establish a clear system of record to eliminate data duplication and inaccuracy
- ✓ Use NetSuite to manage products, accounting, customers or other information
- ✓ Templates accelerate time to value when connecting NetSuite with other systems
