

Jitterbit SuccessCentral

Getting Started

Get acquainted with Harmony, Jitterbit's modern, multi-tenant, born-in-the-cloud integration and API platform.

Announcements

Read the release notes or reference product notices pertaining to third-party software or security.

Design Studio

Access documentation on Jitterbit's project design application where you can design, test, and deploy integrations.

API Manager

Check out resources on creating, publishing, and managing your APIs to share data outside of Jitterbit.

Citizen Integrator

Discover how to connect apps quickly using pre-built recipes or learn to create your own recipes to share.

Management Console

Learn how to manage your integration projects and perform administrative functions for your organization.

Private Agents

Find reference information on configuring and troubleshooting Private Agents (formerly Local Agents) to run integrations on-premise.

Data Loader

Review resources for our free tool for migrating data between flat files, databases, and Salesforce.

Advanced Resources

Peruse our design patterns, library of plugins, and advanced resources to help you become a Jitterbit expert.
