

# Jitterbit SuccessCentral

## Getting Started

An overview of Harmony, Jitterbit's modern, multi-tenant, born-in-the-cloud integration and API platform.

## Announcements

Release notes and product notices pertaining to third-party software or security.

## Cloud Studio

Documentation on Jitterbit's next-generation project design application offered entirely in the cloud.

## Design Studio

Documentation on Jitterbit's desktop project design application that is installed on your machine.

## API Manager

Resources on creating, publishing, and managing custom APIs to share data outside of Jitterbit.

## Citizen Integrator

Materials for connecting apps quickly using pre-built recipes and creating your own recipes to share.

## Management Console

Information on managing integration projects and performing administrative functions for your organization.

## Agent

Information on configuring agents to run integrations within a Jitterbit Cloud Agent Group or a Private Agent Group (on-premises).

## Advanced Resources

Design patterns, a library of plugins, and advanced resources to help you become a Jitterbit expert.
