

# Installing Jitterbit Design Studio on Windows

Installing Jitterbit Design Studio (also referred to as *Jitterbit Studio*) on Windows OS is a simple process with these steps:

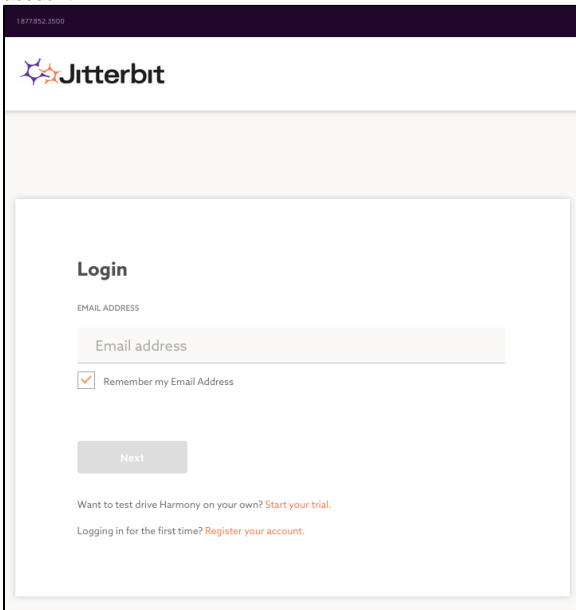

1. [Download the appropriate Jitterbit Studio Installer.](#)
2. [Launch and run the installer.](#)
3. [Launch Jitterbit Studio to check the installation.](#)

If you run into issues installing Jitterbit Studio on Windows, please refer to our support section for assistance.

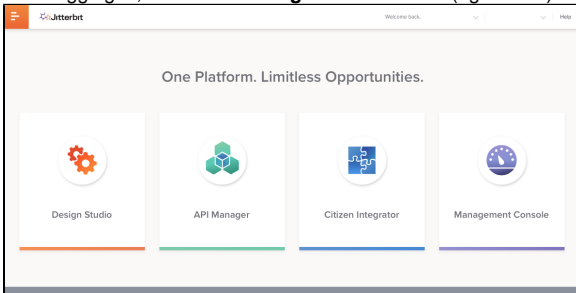

## Installation Steps

### 1. Download the Appropriate Jitterbit Studio Installer

- Log in to the Jitterbit Management Console at [login.jitterbit.com](http://login.jitterbit.com), using either the credentials that were provided to you by Jitterbit or the credentials that you used when setting up your trial account:

- After logging in, select the **Management Console** (right-most) from the cards on the page:

- On the Management Console page, select **Downloads** from the dropdown menu in the top-left corner of the page:

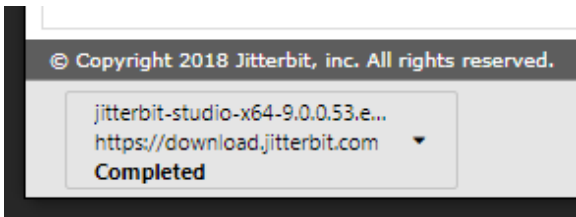

- From the Jitterbit Studio section on the Downloads page, select the appropriate download for your **Windows OS** (shown outlined in red), either for 64-bit (*Windows x64*) or 32-bit (*Windows*):

Name	Download Installer
Jitterbit Agent	<ul style="list-style-type: none"> <li>Windows</li> <li>Linux RPM</li> <li>Linux Debian</li> </ul>
Jitterbit Cloud Data Loader for Salesforce	<ul style="list-style-type: none"> <li>Windows (x64)</li> <li>Windows</li> <li>Mac OS X</li> </ul>
Jitterbit Studio	<ul style="list-style-type: none"> <li>Windows (x64)</li> <li>Windows</li> <li>Mac OS X</li> </ul>
<b>Jitterbit Connectors</b>	
Microsoft Dynamics AX 2009	Windows
Microsoft Dynamics AX 2012	Windows
Microsoft Dynamics AX 4.0	Windows
Microsoft Dynamics CRM 2011	Windows
Microsoft Dynamics CRM 2015	Windows
Microsoft Dynamics GP 10	Windows
Microsoft Dynamics GP 2010	Windows
Microsoft Dynamics 365	Windows

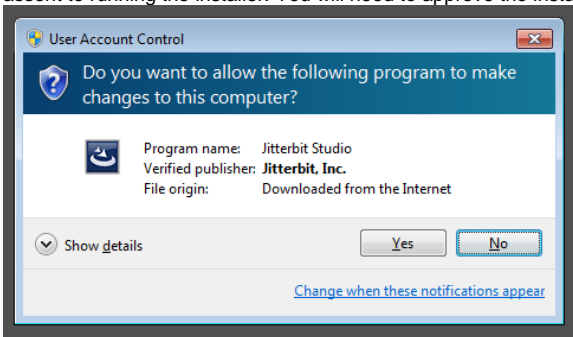

This will download the installer (.exe file) to your browser's download folder, typically your Downloads folder.

## 2. Launch and Run the Installer

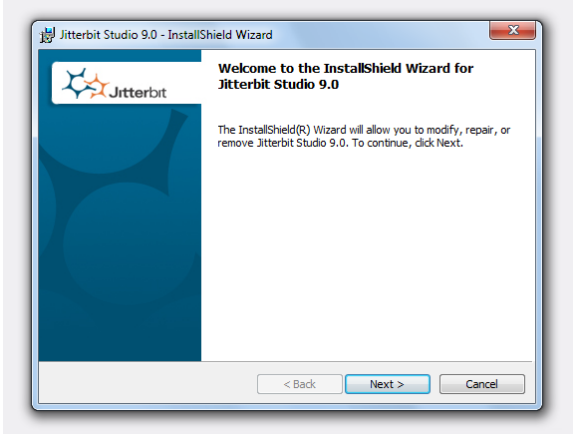

- When the download is complete, open the Jitterbit Studio Installer (.exe) by double clicking the installer file, if it did not open on its own.
- The download location of the installer file may vary depending on your browser and browser settings. In Chrome, it usually shows on the downloads bar at the bottom of the browser window. On other browsers or with other browser settings, the downloaded file may be located elsewhere. You can use a Windows Explorer window to navigate to your Downloads or to search for the download location. Downloaded, the installer file (.exe) would appear in the Chrome downloads bar similar to this:

- When the installer is launched, a User Access Control window will appear, requesting your assent to running the installer. You will need to approve the installer before it will run:

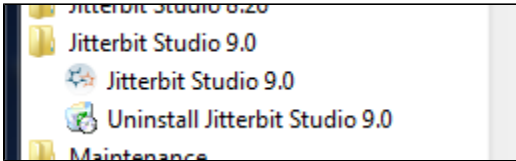

- After approving, the running installer window should then appear:

- Follow the installer's prompts to install Jitterbit Studio on your computer.

### 3. Launch Jitterbit Studio to Check the Installation

- To check the installation, launch Jitterbit Studio.
- From the Start Menu (depending on your version of Windows), select Jitterbit Studio from the menu:

- Jitterbit Studio should start and take you through the splash screen and then to the login dialog where you can enter your username and password:
