

# Announcements

## Announcements

### Overview

Stay in the know! From time to time, Jitterbit has announcements pertaining to third-party software, security, and other general items you might want to be aware of. Announcements especially relevant for you will be emailed to you at that time. You can also check back here for informational notices to reference over time.

These pages are included in this topic:

- [Release Notes](#)  
Read up on what's new in our latest product updates, including release notes for our latest [Harmony](#) release, our free [Data Loader](#) tool, and our [Jitterbit Legacy v5](#) product.
- [Jitterbit Harmony Known Issues](#)  
This page highlights any known problems with recent Jitterbit Harmony releases, including temporary workarounds.
- [Cloud Studio Known Issues](#)  
This page highlights any known problems with Jitterbit Harmony Cloud Studio, including temporary workarounds.
- [Documentation Updates](#)  
In addition to frequent product updates, we're also making continuous improvements to our documentation. Learn about new articles and major updates, or see a list of all recently updated pages.
- [System Status Notifications](#)  
The [Jitterbit Trust site](#) contains real-time information on Jitterbit system performance. Check here if you suspect a system problem, or subscribe to text or email notifications to get automatic updates.
- [End-of-Life Policy](#)  
Find information on discontinued Jitterbit products, as well as upcoming dates for when support will no longer be available.
- [Other Announcements](#)  
From time to time, Jitterbit may have other announcements related to a subset of users. These will typically be emailed to affected customers and also posted in this section for reference. These include:
  - [DROWN Notice](#)
  - [NetSuite 2017.2 Concurrency Governance](#)
  - [NetSuite 2018.2 Token-Based Authentication](#)
  - [TLS Version Compatibility Upgrade](#)
