

# Logging Best Practices Tech Talk

In this Jitterbit Tech Talk, our integration experts build upon our previous *Error Handling Best Practices Tech Talk*, and dive deeper into the topic of custom logging on the Jitterbit Harmony platform.

Developing robust error handling is a critical piece of your integration project which may require up to 25% of project design time. However, without robust logging as part of your error handling strategy, any required debugging becomes quite challenging. Learn some of our go-to tools and strategies for building custom logging within a Jitterbit project.
